Sales to Assessment Ratio Analysis

One factor determining the amount of tax levied on a parcel of property is the value assigned to the property. The accuracy of assessments can be evaluated by comparing them with the actual sale prices of property. The Sales to Assessment Ratio Analysis in the chart below compares, by county, the assessed value of property with its real value (i.e. sale price). The ratio is expressed as a percentage and is found by dividing the assessed value by the selling price. For example, a parcel assessed at $32,000 and selling at $40,000 has an assessment/ sales ratio of 80%.

There are some arm's length transactions which are excluded by statute for use in the sales to assessment ratio study and in the assessment of property. They are sales of property that sell for more than one-hundred fifty percent of its assessed value (SDCL 10-6-74).

Sales for Years 2016, 2017
